

Bugs fixed

Bug	Status	Description	Steps to resolve
Send button kept disappearing	FIXED	CSS stated background-color was white	Updated CSS variables and changed the colour.
Link underline would not remove	FIXED	In dev tools the link decoration was underlined but my CSS stated no underline.	Updated CSS again and ensured changes were pushed to remove underline.
Logo image link broken	FIXED	The logo appears broken when loading the page.	Remove line of code in Bootstrap which clashed with code containing image.
Footer alignment in mobile	FIXED	Part of the footer appears indented when in mobile view.	Checked the Bootstrap code and ensured that the changes were pushed and refreshed the page.
Main container of page was not aligned	FIXED	The Gallery section was wider than the about section	I changed the gutter size to ensure that all sections were same width.
